

# BELLA FIGURA

## Care & Maintenance:

### Lucite Care:

From time to time give the Lucite a clean using a microfiber cloth - you can use in conjunction with a microfiber cloth an anti-static foam cleaner, we recommend the (MAPLINS) Servisol Anti-static Foam Cleanser which can be [found on-line through Amazon](#). Please **do not** attempt to use any solvent-based cleaners, or anything abrasive as this may damage the material.

### Metal Care:

From time to time wipe down the metal only using a microfiber cloth. You can in conjunction with the cloth use anti-static foam cleaner, we recommend the Servisol Anti-static Foam Cleanser which can be found on-line through Maplins. Please do not attempt to use any solvent based cleaners, or anything abrasive as this may damage the metal.

### Glass Care:

The glass pieces can be removed from time to time and individually wiped using a microfiber cloth and some glass cleaner.

If you want to get some shine into the glass, you can use a little warm water and either a dash of rinse aid or white wine vinegar on the glass. Then allow the glass to dry and wipe with a microfiber cloth. Do be careful not to get any cleaning product anywhere near the metal.

### Shade Care:

With our shades, from time to time you may want to remove any dust or dirt, which may have accumulated over time.

You can do this by running a duster or a very soft brush along the sides and inside of the lampshade. To give the shade a full clean we recommend removing the lampshade from the base, but being careful only to hold the shade by the metal frame of the shade. Do not hold the shade by the laminated sides as this may cause permanent damage.

Never use any cleaning product on the lampshade, as this may also cause permanent damage.

**Warranty:** Subject to reasonable use, we will repair or replace product within 12 months
